EDUCATION

Indian Institute of Information Technology, Nagpur

Nagpur, India

Bachelor of Technology in Electronics and Communication Engineering (IoT)

Aug. 2023 – June 2027

Rajkiya Ashram Paddhati Vidyalaya

Colonelganj, Uttar Pradesh

Senior Secondary (Class XII); Percentage: 78.6%

2021 – 2022

St. Xavier Senior Sec. School

Gonda, Uttar Pradesh

Secondary (Class X); Percentage: 89.3%

2019 – 2020

TECHNICAL SKILLS

Flutter & Dart: Flutter, Dart, Material Design 3, Custom Widgets, Responsive/Adaptive UI, GoRouter, Platform Plugins

State Management: Riverpod, Provider

Local Storage & Offline Sync: Hive, Drift (SQLite), Background Sync, Offline-First Design

Backend & Cloud: Firebase (Firestore), Supabase, PostgreSQL, FastAPI, Docker, Oracle Cloud Infrastructure

Architecture & Patterns: Clean Architecture, Offline-First, Command Pattern, REST APIs

Web & Other Languages: React.js, Node.js, Express.js, JavaScript, TypeScript, Python, C/C++, SQL, HTML/CSS

Tools: Git, VS Code, SQLAlchemy, Docker Compose

PROJECTS

Logic Grid | Cross-Platform Nonogram Puzzle Game | *Flutter, Dart, Provider, Hive, Supabase, PostgreSQL*

- Built a cross-platform **Flutter/Dart Nonogram (Picross)** game with 90+ campaign levels, scalable 5×5–15×15 grids, multiple game modes, and procedural puzzle generation.
- Architected an **offline-first data layer** with **Hive** for local persistence and **Supabase/PostgreSQL** for cloud synchronization and cross-device saves, using **Provider** for state management.
- Engineered a deterministic puzzle engine in Dart with **run-length clue generation**, **puzzle validation**, **state tracking**, and **Command Pattern**-based undo/redo.
- Developed a **community level studio** for user-generated puzzles: creation, solvability validation, publishing, discovery, tagging, and player ratings.
- Integrated native services through Flutter plugins: **Google Play Games Services**, **AdMob**, **notifications**, **achievements**, and **leaderboards**.

MedTrack | Pharmacy Back-Office Application | *Flutter, Drift (SQLite), FastAPI, PostgreSQL, Docker*

- Engineered a cross-platform **Flutter** pharmacy management app backed by a **FastAPI** service, covering batch-level inventory tracking, B2B wholesale billing, procurement, and distributor ledgers.
- Implemented an **offline-first architecture** with local **Drift (SQLite)** storage and background synchronization so the app keeps working through network interruptions.
- Deployed containerized **FastAPI**, **PostgreSQL**, and **Caddy** services on an **Oracle Cloud Infrastructure VM** using Docker Compose, with automatic SSL reverse proxy and database backups.

UrbanLeafs | SME Business Management App | *Flutter, Riverpod, GoRouter, Firebase*

- Developed a Flutter SME operations app integrating **inventory tracking**, **order processing**, **staff attendance**, and transaction management.
- Built a responsive **Material Design 3** UI with **role-based access**, **Riverpod** for state management and data flow, and **GoRouter** for navigation.
- Implemented **Cloud Firestore**-backed financial modules for **transaction histories**, **balances**, and **expense reports**.

ACHIEVEMENTS

Google Cloud Skill Badges: Earned badges for **Introduction to Generative AI**, **Prompt Design in Vertex AI**, and **Develop GenAI Apps with Gemini & Streamlit**.

Innovate-X (IIT Kharagpur): Participated in Optima 2025, the techno-optimization fest organized by the Department of Industrial and Systems Engineering.
